Professional Summary

DevSecOps and software engineering leader with 20+ years of experience delivering secure, mission-critical systems for U.S. Department of Defense organizations. Builds cloud-native platforms, Infrastructure as Code, CI/CD automation, and application security solutions across AWS, Kubernetes, Linux, and Windows environments. CISSP-certified technical lead experienced in Zero Trust architecture, vulnerability remediation, Agile delivery, and cross-functional team leadership.

Technical Skills

Cloud and Platforms: AWS, Amazon EKS, Kubernetes, Docker, Helm, Kustomize, Terraform, Cilium, Istio, Linux, Windows Server

Programming and Frameworks: Python, PowerShell, C#, Java, C, F#, SQL, Bash, ASP.NET Core, React, TypeScript

DevSecOps and Security: GitLab CI/CD, Ansible, Infrastructure as Code, Zero Trust, DISA STIG, Fortify, Semgrep, Syft, Gripe, Twistlock, Skopeo, OpenSearch

Certifications: CISSP, GIAC Cloud Security Automation, Scrum Alliance Certified ScrumMaster

Security Clearances: TS/SCI, Yankee White

Professional Experience

AnaVation LLC / Unified Platform

Lead Software Engineer

San Antonio, TX | July 2024 - Present

- Lead OpenCTI infrastructure engineering for a seven-person cross-functional team, partnering with product owners and Scrum leadership to deliver prioritized capabilities.
- Architected secure OpenCTI deployments across IL-2 and IL-5 environments using Kustomize, Cilium, and Istio to enforce Zero Trust network policies.
- Built Infrastructure as Code with Terraform and Amazon EKS to scale threat detection and identification capabilities for Cyber National Mission Force teams.
- Hardened more than 50 containers through multi-stage builds and approved DevSecOps base images, remediating findings from Fortify, Semgrep, Syft, Gripe, and Twistlock.
- Automated multi-project GitLab workflows with Mani and glab, reducing Filigran release upgrades from days to less than one hour.
- Developed multi-layer Terraform deployments, offline container distribution with Skopeo, centralized OpenSearch logging, and SeaweedFS-backed persistence.

688 Cyber Wing / A9R

Lead Developer, Rapid Capabilities

Lackland AFB, TX | April 2021 - July 2024

- Automated No Strike list consolidation with Python and PowerShell, reducing manual processing by 90% across wing organizations.
- Led the Wing Organic Development working group and partnered on Ansible-based STIG automation and MongoDB data collection.
- Served as a subject-matter expert for Agile delivery, AWS services, threat-hunting exercises, and Infrastructure as Code initiatives.

Defense Media Activity

NCOIC, Enterprise Applications

Fort George G. Meade, MD | March 2018 - April 2021

- Led the Enterprise Applications team and delivered ASP.NET applications supporting the Department of Defense media broadcasting mission.
- Translated customer requirements into domain-driven application designs and code-first database migrations.
- Introduced automated server provisioning and functional acceptance testing to improve deployment consistency.

White House Communications Agency

Application Developer and Database Administrator
Washington, DC | March 2014 - March 2018

- Developed and maintained ASP.NET applications supporting the presidential travel mission.
- Led a greenfield domain migration, provisioning eight servers across two hot sites and two warm sites.
- Led a DevOps assessment of Infrastructure as Code and open-source software on containerized Linux servers.

Lemay Wargaming Institute

Joint Wargame Programmer
Montgomery, AL | March 2010 - March 2014

- Supported multinational capstone war games and used database analysis to identify root causes in damage reports.
- Led penetration-testing remediation and implemented A* pathfinding enhancements for the SIMWAR engine.
- Modernized the BottomLine financial wargame to export human-readable reports and spreadsheets.

552nd Communications Squadron

AWACS Database Systems Analyst
Oklahoma City, OK | March 2004 - March 2010

- Refined emitter parameters to eliminate ambiguous identification and maintained maps and configuration data for missions supporting Operations Iraqi Freedom and Enduring Freedom.

Selected Projects

CCRI Compliance Automation

Technologies: PowerShell, DISA STIG Checker

- Automated DISA STIG compliance checks across 14 web servers and scanned millions of files spanning three domains before an Inspector General inspection.
- Earned CIO recognition for eliminating an estimated five months of manual CCRI preparation effort.

OpenCTI Platform Observability

Technologies: Grafana, Loki, Mimir, Tempo, OpenTelemetry, Kubernetes

- Engineered an integrated observability stack for OpenCTI using Grafana, Loki, Mimir, Tempo, and OpenTelemetry to centralize logs, metrics, and distributed traces across Kubernetes workloads.
- Delivered the initial OpenCTI release through penetration testing with zero findings.

No Strike

Technologies: PowerShell, Microsoft Excel, JSON

- Delivered a graphical reporting tool in less than four weeks that consolidated and sorted hundreds of spreadsheets for vulnerability remediation.

Greenfield Infrastructure Migration

Technologies: Windows Server, F5 BIG-IP, PowerShell

- Standardized and scripted provisioning for web servers, database servers, and 20 development environments.
- Designed a hub-and-spoke topology with F5 BIG-IP load balancing for onsite infrastructure and offsite warm backups.

Education

Park University

Bachelor of Science in Computer Science
Parkville, MO | July 2024

The Community College of the Air Force

Associate of Technology in Computer Science
Montgomery, AL | June 2009
